**This is to certify that**

Ernesto Bocini

from

University of Bologna

was named

Regional Winner

from

Europe

in the

Computer Science

category in **The Global Undergraduate Awards** 2022 Programme.

The Global Undergraduate Awards is an international academic awards programme that recognises originality, innovation, and excellence at the undergraduate level. This individual has been recognised as being the highest-performing Highly Commended Entrant from the UA region in their category, which was open to all undergraduate students in universities, colleges, and institutes around the world.

The submissions were assessed by a Judging Panel of international academics, led by a Chair or Co-Chairs, and the process has been deemed as fair and appropriate.
